

‘Cause pups need  
vacations too

Woof

# Dear Four-Legged Friend,

## Welcome to the Manoir Belle Plage!

From the moment you arrived, we could tell what a good girl or boy you are. We're sure you'll have no trouble following these few simple rules to ensure peaceful cohabitation with your neighbors—canine and human alike:

### **Never Without My Human**

Whenever you leave your room, make sure to bring your human along and remind them to keep you on a leash.

Dogs must be accompanied and leashed at all times.

### **No Poop, No Problem**

Nobody wants to play, run, or picnic near your poop. Make sure your human picks up after you. Baggies are available near the children's play area.

Pet owners are responsible for picking up their pet's waste both on hotel grounds and in the surrounding area.

### **No Lady and the Tramp-ing Here**

The restaurant is for humans only. Sorry, bud!

Only assistance dogs are allowed in the restaurant.

### **Don't want to be ALL BY MYSEEEEEEEELF 🎵**

Even well-traveled pups can feel anxious in a new place. Don't be a hero—never stay alone in the room.

Animals must never be left alone in the room under any circumstances.

#### **House Tip**

"If dogs aren't allowed in the restaurant and can't be left alone in the room, how am I supposed to have breakfast?" Easy! Just take turns picking up your breakfast and enjoy a well-deserved breakfast in bed with your furry friend.

### **And now, for the serious stuff...**

Any disturbance caused by the animal to other guests or hotel staff must be immediately brought under control by the owner. In the case of repeated disturbances, management reserves the right to require the guest and their pet to leave the premises without prior notice.

The guest assumes full financial and legal responsibility for any damage caused by their animal within the establishment, including damage to property and harm to any person on hotel grounds.

The guest agrees to indemnify and hold harmless the hotel, its owners, and its management from any claims or damages caused by their animal.
